MY NEIGHBOR.

My neighbor is sad and silent as she waits on the shore with me. For the ships that went out hope laden, assail on a summer sea; The days into months have drifted, until courage and patience fail. Not yet have our eyes been gladdened by the sight of a sunlit sail.

And I must not offer to carry the burden her weak arms bear; The weight that my hands are lifting she may not offer to share. When pitiless storms sweep shoreward and skies wear a mask of lead, Then I must not offer her comfort or shelter her helpless head.

And I, too, look wearily seaward; I know we are one in heart. We watch the wet sands together, but in speech keep ever apart. For I never speak to my neighbor—and she may not speak to me— Of the ships that we wait together by the shore of the sobbing sea.

But I, I may sing of courage and of hope till the watcher's eyes Look up from the wreck strewn billows to the light in the sunset skies; I may sing of the tropic ocean, where the sun-shine, full and warm Falls over the landlocked harbors, where the ships outside the storm.

I may sing of noble patience, that can watch till the day is done, Till straying ships sail shoreward with their cargoes, one by one; And I know I comfort the neighbor who is in-spiration to me, While we watch and wait together for the ships that we went to sea.

—Housekeepers' Weekly.

Telepathy Like Electricity.

It was at first seemingly a slight thing that a straw or other light body is attracted to and will for a time adhere to amber or sealing wax or glass which has undergone brisk friction; yet this was one of the first stepping stones toward the discovery of the mysterious agent which we term electricity, an agent operating through all matter, animate and inanimate, reaching from the earth to the sun, and probably to the utmost bounds of the seemingly infinite ether, and yet not intractable, but lending itself in most various ways to the service of man.

So with each new telepathic fact, however seemingly trivial, a higher standpoint is attained, the horizon widens and there is good reason to believe that the same laws are at work in regions widely dissimilar. One may even suspect that, like electricity in the material universe, so this mysterious agent in the region of the human mind, whether perceptible or not, is still of universal operation, manifesting itself sometimes naturally, sometimes under artificially produced conditions.—Blackwood's Magazine.

Jockeying Authors.

Apropos of horses. Do you know how important good jockeying is to authors? Judicious management; letting the public see your animal just enough, not too much; holding him up hard when the market is too full of him; letting him out at just the right buying intervals; always gently feeling his mouth; never slackening and never jerking the reins—this is what I mean by jockeying.

When an author has a number of books out a cunning hand will keep them all spinning, as Signor Blitz does his dinner plates, fetching each one up as it begins to "wobble" by an advertisement, a puff or a quotation.

Whenever the extracts from a living writer begin to multiply fast in the paper without obvious reason there is a new book or a new edition coming. The extracts are ground bait.—Oliver Wendell Holmes.

Collection Boxes Not Much Used.

Collection boxes were at one time used in many churches. The old style is a shallow open box about seven inches long by five wide. It is lined with velvet and has a handle attached. Boxes of this style are still used, but collection boxes are now generally made circular in form. They are seven and a half inches in diameter and two and a half inches in depth. A plush mat is laid on the bottom, and the box is provided with a handle two feet or three feet long. Such a box of oak sells for \$3.50. Not many boxes are sold nowadays.—New York Sun.

A Dog's Love.

The attachment of the dog to man outweighs and almost obliterates attachment in him to his own race. There is something shocking to our high opinion of him in the callousness with which he will sniff at the stiff body of a brother dog. He will follow his master to the grave, and sometimes die on it, but the loss of his own kind leaves him unmoved. I never knew more than one exception to this.—Ouida in North American Review

It was long thought that the water from melted snow was the purest of all water. This idea has been proven incorrect, as the reverse is the case. Snow is really a purifier of the atmosphere, attracting from it, as it falls, various impurities, and these are found in the snow water.

Some metals, as lead and antimony, condense on union; others, like gold and silver, expand. This, as well as the heat given out in alloying, especially when brass and bronze are formed, proves that an alloy is not a mere mechanical mixture but a true chemical compound.

Taking a mild bath while one is warm is not to be condemned if his circulation is not greatly disturbed and his power depleted, the one condition being alone necessary to successful bathing, viz., power in the organism to respond to the new conditions.

Living in Chili Comes High.

A lady's bonnet in Chili cost from \$30 to \$100, dress silk from \$6 to \$30 the yard, and the modiste will charge you from \$30 to \$50 for making it. In Santiago I paid \$12 the dozen for linen handkerchiefs of small size and ordinary quality, and \$18 for a pair of button boots which at home would have cost about \$4.50. I am informed that a gentleman's suit of common clothes cost from \$60 to \$100, and a pair of patent leather shoes from \$15 to \$30, and a silk hat not less than \$25. Breadstuffs are correspondingly high and far beyond the reach of the poor Rotos.

But there is one luxury in which the poorest Chilean woman will indulge, whatever else may be wanting, and that is a stiffly starched white petticoat. Though her dress may be ragged, her feet and head bare, she would no more do without it than a Nantucket skipper would dispense with his pipe. I have seen them spattering around in the mud, displaying beautifully laundered white skirts, trimmed with hand embroidery or crocheted lace a quarter of a yard deep, adorning dirty brown legs that were exposed to view above the knee. The first essentials of dress for a Roto woman, young or old, are a voluminous white petticoat, a black mantilla, a cigarette and a box of musk, gown, shoes and other toggery being mere accessories.—Cor. St. Louis Chronicle.

Fashions in Colors.

Just as we were getting used to black dresses for the street, there is a decided turn of fashion's wheel and we have the most delicate tints and tones, and colors so light that one could fancy our metropolitan thoroughfares a fashionable parade ground for dressy toilets instead of the dusty, glaring streets of a great city. Very light tan color, brown, wood shades, grays of all sorts, yellow in every variation, light blue, delicate green and dull pink are among the most popular colors.

Cloth suitings, camel's hair and fine twills of various sorts are shown in small checks or narrow stripes, in which are white, yellow, light blue and tan, gray or brown threads. A handsome plaid is made up of dull pink, pale blue, nut brown and lemon yellow threads in about equal proportions. Another has a predominance of the yellow glaring green, which is one of the lending colors of the season, and will be very generally used in millinery as well as in suitings.—New York Ledger.

In Saxony pearl mussels are carefully opened and examined upon being taken out of the water without injuring them, special instruments being used for the purpose. Those which are found not to contain pearls are restored to their native element.

A truthful citizen of Cordale, Ga. caught a rabbit with a gold watch chain around his neck, and he has since been coaxing the animal to put him on the trail of the rabbit that has the watch.

"German Syrup"

Martinsville, N.J., Methodist Parsonage. "My acquaintance with your remedy, Boschee's German Syrup, was made about fourteen years ago, when I contracted a Cold which resulted in a Hoarseness and a Cough which disabled me from filling my pulpit for a number of Sabbaths. After trying a Physician, without obtaining relief—I cannot say now what remedy he prescribed—I saw the advertisement of your remedy and obtained a bottle. I received such quick and permanent help from it that whenever we have had Throat or Bronchial troubles since in our family, Boschee's German Syrup has been our favorite remedy and always with favorable results. I have never hesitated to report my experience of its use to others when I have found them troubled in like manner." REV. W. H. HAGGARTY, of the Newark, New Jersey, M. E. Conference, April 25, '90. A Safe Remedy.

G. G. GREEN, Sole Man'r, Woodbury, N.J.

THE TRAFFIC ASSOCIATION.

The association recently formed in San Francisco, under the name of the "Traffic Association of California," is composed of the leading merchants and producers throughout the State, and it is very likely that the State of Nevada will derive some benefit from the Association.

At a meeting of the San Francisco Chamber of Commerce last Tuesday, the Report says ex-Mayor Pond introduced the following resolution, endorsing the "Traffic Association of California," organized by the merchants and producers last Saturday:

"WHEREAS, The present condition of our trade, commerce and traffic is very unsatisfactory and demands cheaper and better facilities for shipping our products; and whereas, the future development of the resources of our great State depends largely upon cheaper passenger rates from the East, and more favorable conditions of transcontinental freights; and whereas, we cannot expect prosperity without a market for our products that can be reached without paying away all the profits in transportation; and whereas, the Chamber of Commerce of San Francisco recognizes the necessity of some organization of our merchants, manufacturers and producers to unite together for the accomplishment of the general purpose of doing all in their power to build up the commercial prosperity of San Francisco and the State of California by encouraging the building of canals, competitive systems of railroads, steamship lines, and for such other purpose that may tend to develop the interests and trade of our State. Therefore, be it

"Resolved, That this Chamber of Commerce does hereby endorse the Traffic Association of California, just formed with the aforesaid objects in view.

"Resolved, That an organization of the mercantile element, united together on this great and momentous question of such serious import to our city and State, will prove of vast and lasting benefit to our industries, interests and trade.

"The Traffic Association resolutions were unanimously adopted without discussion after ex-Mayor Pond had spoken. He briefly referred to the importance of the movement begun by the merchants, saying that the objects and plans had been given general publicity."

WHO PAYS THE DUTY?

Mr. Phillip A. Young, a farmer of Massillon, Ohio, gets a "horse" on McKinley, and those protection shouters who declaim that the foreigners and not the American consumer pays the duty on imported articles. The proposition is so ridiculous that one is surprised that it should be made. Last week Mr. Young addressed the following interesting letter to Major McKinley:

"MASSILLON, October 12, 1891.

"I would like to ask Major McKinley, through the columns of your paper, if I have any redress on the Toronto Ditching Machine Company for \$95 tariff I paid on a ditching machine. I bought the machine from the company at Toronto for \$230. They shipped the machine to me at Cleveland. I had been told by you that the duty was paid by the foreigner, and little expected when I went to Cleveland to get my machine that the custom-house officers would present a tariff bill for \$95, which I had to pay before I could get my machine. Please advise me at your earliest convenience whether I have any redress. Yours respectfully, PHIL A. YOUNG."

CHEAP RESERVOIRS.

Mr. C. D. Durban says that the cheapest reservoir that a man can build on his land for retaining water for irrigation purposes is a tunnel run into a hill. An open reservoir in a canyon or other suitable place will lose one-third of its water during the summer by evaporation, while in a tunnel there is no loss. A small spring will supply a tunnel with sufficient water for many purposes. He has illustrated this in a practical manner. On his own land at Mesilla Valley he ran a tunnel thirty-five feet long into a hill, in so doing, tapping a spring; this tunnel he dammed up, leaving a space thirty-five feet long and the size of the tunnel, which is about five by six feet, to be filled with water. The water he carried to his house in pipes and he observed that it supplied his dwelling, another near by, his barn and drying house for raisins, as well as irrigated quite a space devoted to flowers for a garden. He says that a tunnel is the cheapest and best form, and that for each dollar expended, one can obtain a space equal to twenty-five cubic feet.—Scientific American.

Farmers' Alliance in California.
Special to the Journal.

LOS ANGELES, October 21.—The State Convention of the Farmers' Alliance and Industrial Union continued in secret session all day. The members are very reticent and decline to give out any information to the public. They say only routine business was transacted, and this afternoon was devoted to the election of officers but was not concluded.

The citizens' Alliance also met in secret session to-day. To-night Col. Polk, the National President of the F. A. & I. U., addressed a large crowd at the Pavilion on the issues now before the country.

BY TELEGRAPH!

News of Importance From Home and Abroad.

THE SEARLES WILL CASE

Reopened To-Day—Searles on the Witness Stand.

Special to the Journal.

SALEM, Mass., October 21.—Hearing in the Searles will case was resumed this morning, with Edward F. Searles on the stand. L. S. Dabney appeared for the first time with counsel for the will, and Russell J. Wilson of San Francisco joined the counsel for the contestants.

At the opening, Barley, for the contestants, asked if Searles knew why Timothy Hopkins had not been notified before November 3 of the proposed marriage, and he replied that he never dictated to Mr. Hopkins anything in regard to her son. He first heard of the marriage settlement from Mrs. Hopkins. Witness objected to the marriage settlement after the English style, as it looked too much like buying a husband. Witness did not read the paper when it was signed. He was told that it was a marriage settlement, and knew it could not impose any giving by him to her, as he had nothing in particular to give by a marriage settlement. His wife probably knew its contents, as she had caused it to be made. He did not know whether there had been anything paid as compensation for a trustee under this marriage settlement. Witness never opened a letter to his wife before their marriage, and none without her permission since.

Mr. Barley here called for the diaries kept by Mrs. Searles while in Europe.

Searles said he did not understand the lawyers were to have sixty-five thousand dollars a year in any event, but they were to have 10 per cent. of the income for their services. The Searles will made on the same date as that of his wife was submitted as evidence. It left all his property to his wife. Searles testified that he had a repugnance to recording a marriage settlement.

Great Races.

Special to the Journal.

NASHVILLE, October 21.—Thousands of broken Tennessee hearts and thousands of empty pocket books were carried away from Cumberland Park this evening. Direct, that matchless California pacer, had showed Hal Pointer his heels with ease in three straight heats. The time of the second heat was the best ever made in a race in harness, lowering Pointer's record half a second. In the first heat Pointer had the pole and held it until the quarter when Direct, who had been on almost even terms with him from the start, made a magnificent start and pulled away. The second heat saw Direct at the pole and he held it throughout. The best Pointer could do was to stay abreast up to the half mile, when Direct gradually drew away.

The last heat was a repetition of the others. Time by quarters was, first heat, 32½, 1:05½, 1:38½, 2:10; second heat, 32½, 1:04½, 1:36½, 2:09½; third heat, 32½, 1:05, 1:38½, 2:11. It was believed by many that Direct could have gone in 2:08 had Pointer pressed him more closely. Pointer was a big favorite in the pools on the first heat, selling for \$100 against \$30 for Direct. Betting or the second heat was not materially changed, but the third found Direct selling at \$10 against \$5 for Pointer.

The Boodlers in Danger.

Special to the Journal.

SAN FRANCISCO, October 21.—The Grand Jury late this afternoon made a partial report to Superior Judge Wallace. The report consisted of the finding of two indictments against Assemblyman Elwood Bruner of Sacramento. One indictment charges Bruner with perjury, committed while giving testimony in the Grand Jury room. The other indictment charges Bruner with malfeasance in office during the late session of the Legislature. The malfeasance consisted in the killing of the bill providing for the cinching of cut-rate brokers, particularly in the case of Ticket Broker Ottinger of this city, who accuses Bruner of attempting in connection with Assemblyman McCall of Alameda to blackmail him out of \$1,000. Judge Wallace ordered bench warrants issued for the arrest of Bruner which was immediately done. Bruner is the Assemblyman who was charged with the setting of positions on the San Francisco police force. The Legislative Committee investigated the case and returned a majority report of guilt with extenuating circumstances. The Legislature refused to receive the report of the Committee and so indicted Bruner.

California Irrigation.

Special to the Journal.

LOS ANGELES, October 21.—The State Irrigation Convention to-day resumed the discussion as to the marketing of the irrigation bonds. A new Board of Directors was chosen. The Convention endorsed the labors of the Irrigation Congress held recently at Salt Lake. The Convention adjourned this afternoon to meet at Sacramento the first Monday in January, 1893.

Bank Robbers Arrested.

Special to the Journal.

LA GRANDE, Or., October 21.—Three men were arrested at Kamela Station on the Union Pacific in this county last night by a private detective, charged with being the parties who robbed the bank at Enterprise, Wallawa county, October 8.

A Prize Fight Fake.

Special to the Journal.

SAN FRANCISCO, October 11.—The fight between the Australian, Billy Maher, and Billy Mohan of San Francisco at the Occidental Club to-night was declared off by the Directors. Both men were present, but as Maher had recently recovered from a fever, he was examined to-night by a physician, who declared him unfit to fight. Maher was greatly disappointed, and declared he was able to fight. This is the second match forfeited to Mohan by Maher on account of illness.

Mahan met Mohan outside the ring, and through his backer posted a thousand dollars' forfeit at once to fight Mohan any time; he also offered to go out and fight anywhere for a hundred dollars. Mohan declined the proposition on the ground that it was not legal to fight outside of an organized club, and that as physicians had decided Maher in no condition he, Mohan, refused to meet him at all.

Another Prize Fight on the Tapis.

Special to the Journal.

SAN FRANCISCO, October 21.—Jack Dempsey and Young Mitchell, well known pugilists, have signed a contract with H. E. Williams of Pittsburg to make a sparring tour of the East, and will leave for that city in about two weeks. In regard to Fitzsimmons' challenge Young Mitchell said he would be willing on his return to meet the latter in a ten-round go.

Wm. O'Connor, the Canadian carman, left here for the East last night to supervise the building of some new racing boats. Before leaving he offered to meet Henry Peterson of this city, whom he has once defeated over a three mile course, either in Alameda, Cal., or Pullman, Ill., for a thousand dollars a side, at any time within six months. O'Connor expects to get a match with Stangburg on the latter's arrival here from Australia.

A Nevada Industry.

Special to the Journal.

CARSON, Nev., October 21.—The Nevada Creamery and Commercial Company, incorporated to-day for the purpose of manufacturing and dealing in butter, cheese and condensed milk; to build, purchase, acquire lands, buildings, factories, etc., for storage and sale of products; to deal in farming implements, live stock and merchandise of all kinds. The trustees are Julius Kanpsch, Franz Kanpsch, Senator Evan Williams, T. R. Hofer, Governor R. K. Colcord, Jake Klein, James R. Judge. The capital stock is \$100,000 divided into the same number of shares at \$1 each. The corporation will operate in Mason Valley, and will import large quantities of milk cows from various points.

The Carson Valley Creamery, also under the direction of Kanpsch Bros., cannot supply the San Francisco demand for Nevada butter. It is estimated that five creameries will be necessary. Other plans are in progress in other sections.

Record Running.

Special to the Journal.

BROCKTON, October 21.—A number of horses went against records to-day. The following are the principal ones. Valentin's Sid Fleet, two-year-old, made 2:28½ in a match race. The Palo Alto mare Norhawk, record 2:27½, made 2:20½. Frou Frou, a yearling by Sidney, went in 3:11. The meeting adjourned until next Saturday, when Sunol will probably start again. The mare will remain in Marvin's charge another month.

Programme.

The following is the programme of the Ladies' Aid Society of the M. E. Church, which will be given at McKissick's Opera House, Friday evening, October 23d:

PART I.

Quartet..... Mrs. W. S. Bender, Mrs. B. F. Layton, Messrs. Evans and Parry.
Answering an Advertisement..... Mrs. B. C. Shaver and others.
Closing chorus..... Sunbeams Are Glancing

NOVEMBER ELECTIONS.

The following States will hold elections on the 3d of November this year: Virginia will elect one-half its Senators and a full house of Delegates. Iowa and Massachusetts will elect a Governor and State officers and Legislature. Mississippi will elect three Railroad Commissioners and a Legislature. Nebraska will elect Associate Justice of the Supreme Court and two Regents of the State University. New Jersey will elect part of the Senate and Assembly. Ohio will elect a Governor and other State officers and Legislature, and vote

SYRUP OF FIGS
ONE ENJOYS
Both the method and results when Syrup of Figs is taken; it is pleasant and refreshing to the taste, and acts gently yet promptly on the Kidneys, Liver and Bowels, cleanses the system effectually, dispels colds, head-aches and fevers and cures habitual constipation permanently. For sale in 50c and \$1 bottles by all druggists.
CALIFORNIA FIG SYRUP CO.
SAN FRANCISCO, CAL. NEW YORK, N.Y.
LOUISVILLE, KY.

upon a proposed amendment to the Constitution providing for uniformity of taxation.

Pennsylvania will elect Treasurer and Auditor General, and vote whether a Constitutional Convention shall be held, and elect delegates to the same.

New York will elect Governor, Lieutenant Governor, State officers, the Senate, the Assembly, ten Justices of the Supreme Court and a Representative in Congress from the ninth district.

Maryland will elect Governor and other State officers and Legislature.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven Catarrh to be a constitutional disease, and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly upon the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circular and testimonials. Address, F. J. CHENEY & Co., Toledo, O.
Sold by druggists, 75c.

Social Outcasts.

Special to the Journal.

HAWAII, Kau., October 21.—The leading women of the city inaugurated a fight against a troupe of female variety performers. They called upon the Council yesterday and asked them to prevent the performance, but that body refused to interfere. They then armed themselves with pitchforks and rakes and scraped the bills off the boards, and satisfied themselves somewhat by declaring that men who attended the show were social outcasts.

Schofield on Indian Outbreaks.

Special to the Journal.

WASHINGTON, Oct. 21.—Major General Schofield, commanding the army, in his annual report calls attention to the fact that in the case of a general uprising the entire army is wholly inadequate to prevent a great loss of life. He advocates an increase of a few thousand men whereby sufficient forces may be at all times stationed near large reservations, and thus prevent outbreaks.

WHAT IS SCROFULA

It is that impurity in the blood, which, accumulating in the glands of the neck, produces unsightly lumps or swellings, which causes painful running sores on the arms, legs, or feet; which develops ulcers in the eyes, ears, or nose, often causing blindness or deafness; which is the origin of pimples, cancerous growths, or the many other manifestations usually ascribed to "humors;" which, fastening upon the lungs, causes consumption and death. Being the most ancient, it is the most general of all diseases or affections, for very few persons are entirely free from it.

How Can IT BE CURED

By taking Hood's Sarsaparilla, which, by the remarkable cures it has accomplished, often when other medicines have failed, has proven itself to be a potent and peculiar medicine for this disease. Some of these cures are really wonderful. If you suffer from scrofula, be sure to try Hood's Sarsaparilla. "My daughter Mary was afflicted with scrofula sore neck from the time she was 22 months old till she became six years of age. Lumps formed in her neck, and one of them after growing to the size of a pigeon's egg, became a running sore for over three years. We gave her Hood's Sarsaparilla, when the lump and all indications of scrofula entirely disappeared, and now she seems to be a healthy child." J. S. CARLILE, Naughton, N. J.
N. B. Be sure to get only Hood's Sarsaparilla Sold by all druggists. \$1 six for \$5. Prepared only by C. I. HOOD & CO., Apothecaries, Lowell, Mass.

100 Doses One Dollar

Notice. The members of Washington Lodge, No. 25, are requested to be present at the next meeting Wednesday, October 28th. Business of the greatest importance to every member of the Lodge to be transacted.
B. C. SHARLES, Recorder.

Lost. On October 12, between Reno and Steamboat, one gold breast pin, a cameo on one side and a photograph on the other. The finder will please leave at this office and receive a suitable reward.

The horses of the German Cavalry regiments are to be entirely shod with paper shoes, recent experiments as to their durability, etc., having proved entirely satisfactory.

Tickets for the entertainment at the Opera House Friday evening, October 23d, are for sale at C. J. Brookings, C. A. Thurston and Wm. Pinniger. Admission 50 cents, children 25 cents.

The Grand Encampment of Odd Fellows of California is being held at Sacramento. One hundred and fifty delegates are present. Last night there was a grand reception tendered the visitors, a monster torchlight procession through the streets, and a competitive drill followed by a grand ball at the Pavilion.

John Howell, who came to this coast in early days and engaged in mining near Marysville, Cal., and afterwards in Eureka, Plumas county, and returned to his home in Fairport, New York, in 1870, died at that place October 10th, from injuries received by falling off an apple tree. Deceased was a brother-in-law of C. J. Brookings and was well known in Plumas county.

A cable dispatch says that 300 horse power is being transmitted from Laufen, France, to the Frankfurt exposition, the power being obtained from a turbine placed in the channel of the Neckar river, driving a rotation current dynamo, transmitting the power through three thin bare copper wires strung on ordinary telegraph poles a distance of 108 miles with a loss of only 25 per cent. This power runs 1,200 incandescent lights, runs a powerful rotation current motor, a number of small motors, a centrifugal pump supplying a waterfall ten meters high and much other power consuming apparatus.

Winters' Flyers.

Theo. Winters returned from California yesterday, bringing with him the remainder of his thoroughbred horses in his private car. They were taken to his ranch in Washoe Valley. The car contained seventeen animals. Noted among them was the famous Joe Hooker, 19 years old, the sire of many celebrated horses now on the turf, also Atlanta, Lou Spencer, Balnette, Princess of Norfolk, Bonita, Mattie Glen, Jessie R., Countess Zeika and seven colts, all in charge of Mr. McGinty Alias, etc. Mr. Winters is satisfied after a thorough trial that Nevada climate is superior to that of California for breeding good hardy horses, and will in the future raise his horses in this State.

The Water Question.

Sacramento is making an experiment of sinking wells in the great gravel section east of that city with a view of obtaining a supply of pure water. Private wells for irrigating purposes have already shown that any quantity of water can be obtained. It is only a question of time when Nevada will obtain a greater part of its water from artesian wells, and the sooner the experiment is made the better. There is no doubt that Reno could be supplied in the same manner with an abundance of pure water at a trifling cost.

NEEDED LEGISLATION.

Baking Powder Bill Passed by the Minnesota Senate.

The recent newspaper discussion of the dangerous qualities of ammonia comes from the alarming increase of its use in baking powders. People who absorb it in small quantities from day to day suffer from slow ammonia poisoning. Taken internally in sufficient quantities it enters the coatings of the stomach and intestines and causes death. Slow ammonia poisoning produces various forms of stomach trouble.

Not one woman in ten thousand would use an ammonia baking powder if she knew it. Such powders not only undermine the health, but ammonia imparts a sallow and blotched complexion.

Following is the bill recently passed by the Minnesota Senate. It's the danger signal which the law throws out for the protection of the people:

A BILL FOR AN ACT TO REGULATE THE TRAFFIC IN BAKING POWDER.

SECTION 1.—Any person who shall knowingly sell or procure the sale, or offer for sale of any package or can of baking powder containing any ammonia in it, not distinctly, legibly and durably branded, stamped or marked in a conspicuous place with the words in the English language "this baking powder contains ammonia" in letters of great size, or any letters equivalent thereto in length, shall be guilty of a misdemeanor, and punished by a fine not less than \$20 nor more than \$50; shall be confined in the county jail not less than ten or more than twenty days or by both fine and imprisonment at the discretion of the court.

SECTION 2.—The sale or offer for sale of the substance mentioned in the foregoing section in packages not stamped, marked, branded or labelled as therein required, shall be prima facie evidence of knowledge of the character of said substance on the part of the person so selling or offering for sale and his employer.

SECTION 3.—This Act shall be in force on and after its passage.

NOTE.—An incident occurred in the House when the Senate bill came up for passage in reference to an amendment proposed by Mr. Diment. This was opposed by several members. Mr. Feig said that if the bill as it came from the Senate was all right then the amendment was all wrong. The amendment compelling the printing of the word "ammonia" on the label only affected the Royal Baking Powder, and no wonder they felt the Senate bill was a blow at them.—St. Paul Dispatch.

THE LEWIS CASE.

Two Juries Impaneled to Try It.

WINNEMUCCA, October 21, 1891.

The trial of R. W. Lewis, indicted for the murder of A. H. Ruse, October 25th, 1890, commenced in the District Court last Monday before Judge Cheney. The case is being prosecuted by District Attorney Williams and Judge Bonfield and Hon. J. H. MacMillan are for the defendant. Monday was occupied in impaneling a jury and when the venire was about exhausted and eleven jurors in the box it was determined to ascertain if the defendant was sane at the present time. For this purpose another jury was impaneled before whom witnesses are being examined to establish the mental condition of the defendant not only at the present time, but for several years past. The evidence so far is almost conclusive that the defendant not only is now, but for years has been insane. Nearly all the old settlers and the physicians say that he has always been eccentric, and of late years, especially since the death of a favorite child, his actions have been remarkably strange. The general opinion is that he should be in an insane asylum rather than a prison, but what the opinion of the jury is on that matter will probably not be known for a day or more yet, as there are a large number of witnesses yet to be examined. If the jury finds him insane Lewis goes to the Asylum to be held for trial until his reason is restored, should it ever be. If on the other hand the jury finds that he is sane his trial will proceed before the other jury, which is now in charge of the Sheriff. The case attracts considerable attention as Lewis is an old resident of the town, and has a highly respectable family.

THE OHIO CAMPAIGN.

A dispatch dated October 19th says:

Democratic clubs from all over Ohio and a portion of Kentucky were at Cincinnati to-night, and the demonstration in honor of Governor Campbell eclipsed the effort of the Republicans Saturday night. The big Music Hall would not hold half the people who applied for admission to hear the issues of the campaign discussed by the Governor.

Congressman Crisp of Georgia made a magnificent speech, and Governor Campbell exploded the fallacy of McKinley's protection, and took a strong stand in behalf of the silver plank in the Democratic platform.

Although there has been some slight dissatisfaction in Hamilton county concerning Campbell it is believed that the meeting of to-night and his magnificent speech will go far toward bringing out the usual Democratic majority. The Democrats of Cincinnati certainly gave Campbell a fine reception. Senator Brice spoke briefly, and will take an active speaking part in the campaign from now to the close.

Major McKinley spoke at Zanesville this afternoon and evening to small audiences, partially on account of the continuous rain.

McKinley is having a hard time explaining away the numerous points made by Campbell in the Ada joint debate. To-day after explaining the importance of electing a Republican Legislature so as to secure a successor to John Sherman, he replied to Campbell's charge as to the depreciation of the value of farm land. The only excuse he had to offer for the unsatisfactory condition of the farmers was that they should be satisfied now that the State Board of Equalization had reduced the tax valuation of farms so as to place them on a footing with city property.

The Tax Rate May be Lowered.

We hereby present to our readers an act passed by the last Legislature which gives power to the County Commissioners to reduce the rate of taxation if in their judgment it is necessary, in order to prevent the collection of more money than is needed for the running expenses of the county, after the State Board of Assessors and Equalization have increased the value of property in the county by horizontal raises. If it were in its proper place in the statute it would appear somewhere between pages 72 and 97 as all the acts approved on that date (March 19) appear between those pages. Neither is there any reference to it in the index, and it appears on the last page of the statute book. The act is as follows:

An Act in relation to levying and assessing taxes for State and county purposes.

Approved March 10, 1891.

The people of the State of Nevada, represented in Senate and Assembly, do enact as follows:

SECTION 1. All State and county taxes required to be levied by the Boards of County Commissioners of the several counties of this State in pursuance of the revenue laws of this State, shall hereafter be levied by such Boards of County Commissioners on or before the first day of March in each year; provided, that if after the equalization of taxes in the

Highest of all in Leavening Power.—Latest U. S. Gov't Report.

Royal Baking Powder

ABSOLUTELY PURE

THE DREDGING SCHEME.

Extensive Preparations Being Made for Working Tailings From the Bed of the Carson.

Some new plans have been formulated for the working of the tailings in the bed of the Carson river by the Rae Dredging Company. Mr. Rae was on the Comstock yesterday and concluded a contract with A. J. McCone of the Fulton Foundry for machinery for a mill to be erected at Dayton for the reduction of tailings. The first Rae dredge was provided with suction pipes for the purpose of raising the tailings from the bed of the river. The pipes became clogged, however, and the process proved impracticable. On the dredge now in use scoops do the work. Another improvement is to be made also. The boat containing the dredging machinery is to be done away with. A railroad is to be built on the river and the machinery placed on a car which will run upon it. The tailings are first to be concentrated and then milled. The preparations now being made insure at least a fair test of the dredging proposition, and if the results are satisfactory a new industry of considerable proportion will have been established on the Carson river.—Enterprise.

Laid to Rest.

The funeral of Rella Belle Williams, which took place at 3:30 yesterday from the Episcopal Church, was one of the largest, saddest and most impressive ever held in Reno. The church was filled to the uttermost with the many friends and relatives. A large quantity of cut flowers adorned the inside of the church, and the casket was all but covered with them. The hearse was drawn by two white horses. Twelve companions, six boys and six girls, acted as pall bearers. The darkness of the afternoon was dissipated by a rift in the clouds, down through which came a flood of golden sunshine that shone on the sad procession as it wended its way to the Odd Fellows' Cemetery. A long line of carriages followed the hearse, which was surrounded by the young pall bearers, whose sad faces and eyes filled with tears told plainly the agony they felt at the loss of a loved companion. Plunked down, she has gone to bloom in a fairer land. Naught but tenderest memories will ever be linked with the name of Rella Belle, whose kind heart and pleasant face endeared her to all.
